Specifications

`	pecifications
Contact Rating	From low level ¹ to 20 AMPS @ 480 V AC; see ELECTRICAL RATING option section for complete listings.
Electrical Life	150.000 cycles at 20 AMPS @ 250 V AC. Consult Customer Service Center for typical life at other ratings.
Insulation Resistance	1.000 M ohm min.
Dielectric Strength	1.500 Vrms min. @ sea level
Operating Temperature	-55°C to 150°C
Operating Force	From 4 oz. to 26 oz. max. at actuator button available.
Mounting Screws	Torque 3 in/lbs max. (Note: Exceeding 3 in/lbs torque may change operating characteristics and increase the possibility of cracking switch case).
Terminal Screws	Torque 4 in/lbs max.
Panel Mounting Bushing	Torque 4-6 in/lbs max.
Degree of Protection	IP65; Dust-proof. water splash and dew condensation.

Notes:

1. Low Level=conditions where no arcing occurs during switching. i.e., 0.4 VA max. @ 20 V AC or DC max. Standard electrical life per UL 1054, rated for 6.000 operations.

Description

Designers of thermostats, motors and industrial controls need a highly-responsive, protected switch that can withstand repeated use. That's why so many turn to HB series single pole standard precision snap-acting switch. The HB series features low differential travel and high repeatability; comes in a sealed actuator and case; and is available with single and double pole circuitry, to ensure that thermostats and other controls respond to use the same way – regardless of whether it's the first or the thousandth use.

Features & Benefits

- Low differential travel. high repeatability
- Long life—150.000 cycles typical
- Single and double pole circuitry
- Sealed actuator and case

Applications

- Thermostats
- Motors

Industrial controls

Materials

Switch Housing	Heat resistant/electrical grade phenolic.
Inserts	Brass alloy
Actuator Button	Moisture resistant phenolic
Spring	Copper alloy
Pivot	Brass alloy
Movable Contacts	Gold alloy for ratings 1 AMP or less. Fine silver for ratings greater than 1 AMP and motor load ratings less than 1/2 HP @ 125 V AC. Silver alloy for motor load ratings 1/2 HP @ 125 V AC or greater.
Stationary Contacts	Gold alloy for ratings 1 AMP or less. Fine silver welded to copper base for ratings greater than 1 AMP and motor load ratings less than 1/2 HP @ 125 V AC. Silver alloy on copper base for motor load ratings 1/2 HP @ 125 V AC or greater.
Terminals	Brass alloy, bright tin plated.

Notes

Specifications and materials listed above are for switches with standard options. For information on specific and custom switches. consult Customer Service center.

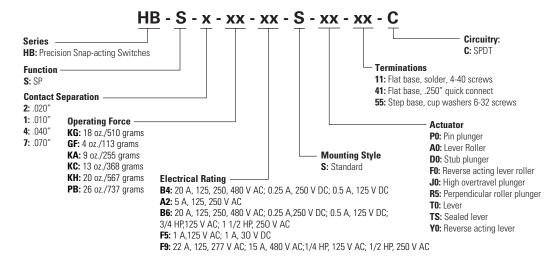

Single Pole Standard Precision Snap-acting Switches

Ordering Number

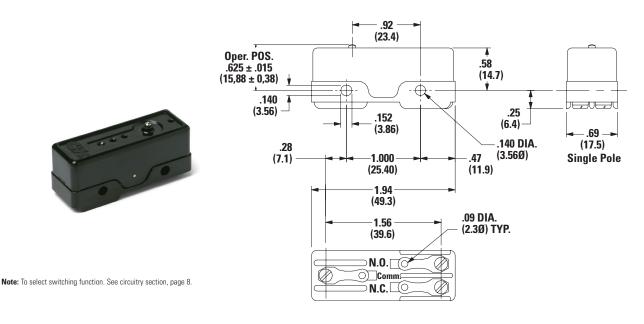

To order, simply select desired option from each category and place in the appropriate box. For additional options not shown in catalog, consult Customer Service Center.

Sealed Actuator and Case

To provide reliable service under environmental conditions that might damage standard precision switches, various HB Series switch models are sealed against the entrance of airborne contaminants and/or splashing liquids. The clearance between the operating plunger and the cover is sealed with a silicone boot and the base cover joint is sealed with an epoxy adhesive. These models are designed to meet requirements of IP65 (dust proof, water splash and dew condensation). For additional information on sealed switches, consult our Customer Service Center.
