

SWITCH SOLUTIONS FOR WEARABLES TECHNOLOGY

Wearables Technology

The Internet of Things is revolutionizing the world we live in. Wearable device technology now allows us to check our email, monitor our health, record a video while skiing or skydiving, and enhance our entertainment experience. The switches used on these devices must be ultraminiature, resistant to sweat and body fluids, and perform reliably over the life of the product.

C&K Tact and Slide switches are among the highest performing products in the world and were designed with these types of applications in mind. In addition to our standard products, we can also customize any switch to meet the most demanding requirements of our customers.

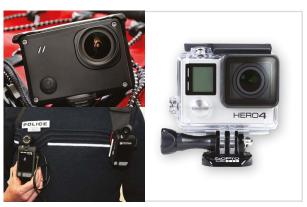

Smart Watch Devices

Activity Trackers / Wearable Health Devices

Action Cameras / Body Cameras

Smart Glasses / VR Glasses
