

Renewal and IATF extend validity Certificate

-

Explanations

IATF 16 949 V2016

IATF 16 949 Certification : Renewal & Certificat Extension (6 months)

- New C&K certification status : IATF 16 949 certification audit was completed on *Thursday January 28th 2021* by *BVQI certification body*, and the auditor has **reconfirmed the renewal of C&K IATF certification**.
- C&K DOLE is waiting to receive its new IATF certificate.
- IATF Waivers and validity : Pending for the reception of the new certificate, The current C&K's certification remains valid for 6 months.
- Please refer to the IATF global waivers and measures in response ti the Coronavirus Pandemic COVID-19.

IATF 16949 CERTIFICATES

The IATF has approved a global extension to all currently issued and valid IATF 16949 certificates.

The extension of six (6) months (i.e. 183 calendar days) to every currently issued and valid certificate (including those certificates that are currently in the status of suspension) will be reflected in the Global IATF Database and subsequently visible in the IATF Certificate Validity Check: [LINK](#)

In this extraordinary situation the IATF-recognized Certification Bodies are not required to reissue the certificates immediately. This document together with automated updates to the IATF Database and the IATF Certificate Validity Check are providing the evidence that the certificate is valid beyond the documented expiration date printed on the certificate.

If the IATF-recognized Certification Body is required to update the certificate due to any changes, the revised expiration date shall be updated accordingly and the certificate shall be uploaded in the IATF Database.

If a certified organization needs an updated IATF 16949 certificate, please contact your relevant IATF-recognized Certification Body.
