

COVID-19 TESTER DEMAND SWITCH SOLUTIONS FOR VIRUS TESTING EQUIPMENT

www.ckswitches.com

COVID-19 VENTILATOR DEMANDS ARE URGENT

High volume, medium volume and rapid response testers are required urgently. Lab centers, hospitals, employers and commercial sites will all need some level of testing going forward.

C&K Switch options for COVID-19 Testers, Ventilators, Monitors, Diagnostic equipment and Critical Care Applications.

The most important global demand today is the increased need for medical grade virus testing equipment as a result from the COVID-19 virus pandemic.

C&K's global sales and customer service teams are supporting COVID-19 Tester design and manufacturing demands with switch options. There are various requirements. Having an extensive and complete product portfolio, with a medical segment focus is critical. Understanding the medical segment demands on performance, quality and competitiveness allows C&K to lead in medical applications. Having a robust inventory for selection, a global distribution network for delivery and a customer-focused approach for support allows C&K to respond quickly and effectively to today's demands.

Superior performance and engineering expertise differentiates C&K's team and our products. Resistance to body fluids, cleaning and sterilization procedures allows for superior performance under challenging conditions. As the urgent demands subside, miniature form factors and tunable haptics are a few features that help device designers succeed when new product developments are the focus.

When the focus turns to new product development, C&K will be there. Switches can be "purpose built" for your specific application. Options can include lighting features, wire terminations or even built into modules based on specific customer requirements.

APPLICATION AND SUGGESTED C&K SWITCH OPTIONS

TESTERS

Detects: All series support the detection of a sample

Snap
(ZMS/LCS/ZMSM series)

Tacts
(KSC/PTS series)

Rocker
(CL/D/DA series)

Pushbutton
(8020/8700/8500/AP/NP series)

Pushbutton: Anti-vandal,
Sealing & latching capabilities

Toggles
(7000/PT Series)

Slides
(V series)

VENTILATORS / RESPIRATORS

		K12/ K2G	KSC	KMR	PCM	PTS830	JSM	KMT0	ENC	EP	8020	CR	D
SURGICAL & CRITICAL CARE	Electro-surgery Instruments & controllers		•	•					•			•	•
	Surgical Lasers			•	•	•	•	•					
	Defibrillators		•						•	•	•		
	Minimally Invasive Surgical Tools	•	•	•									

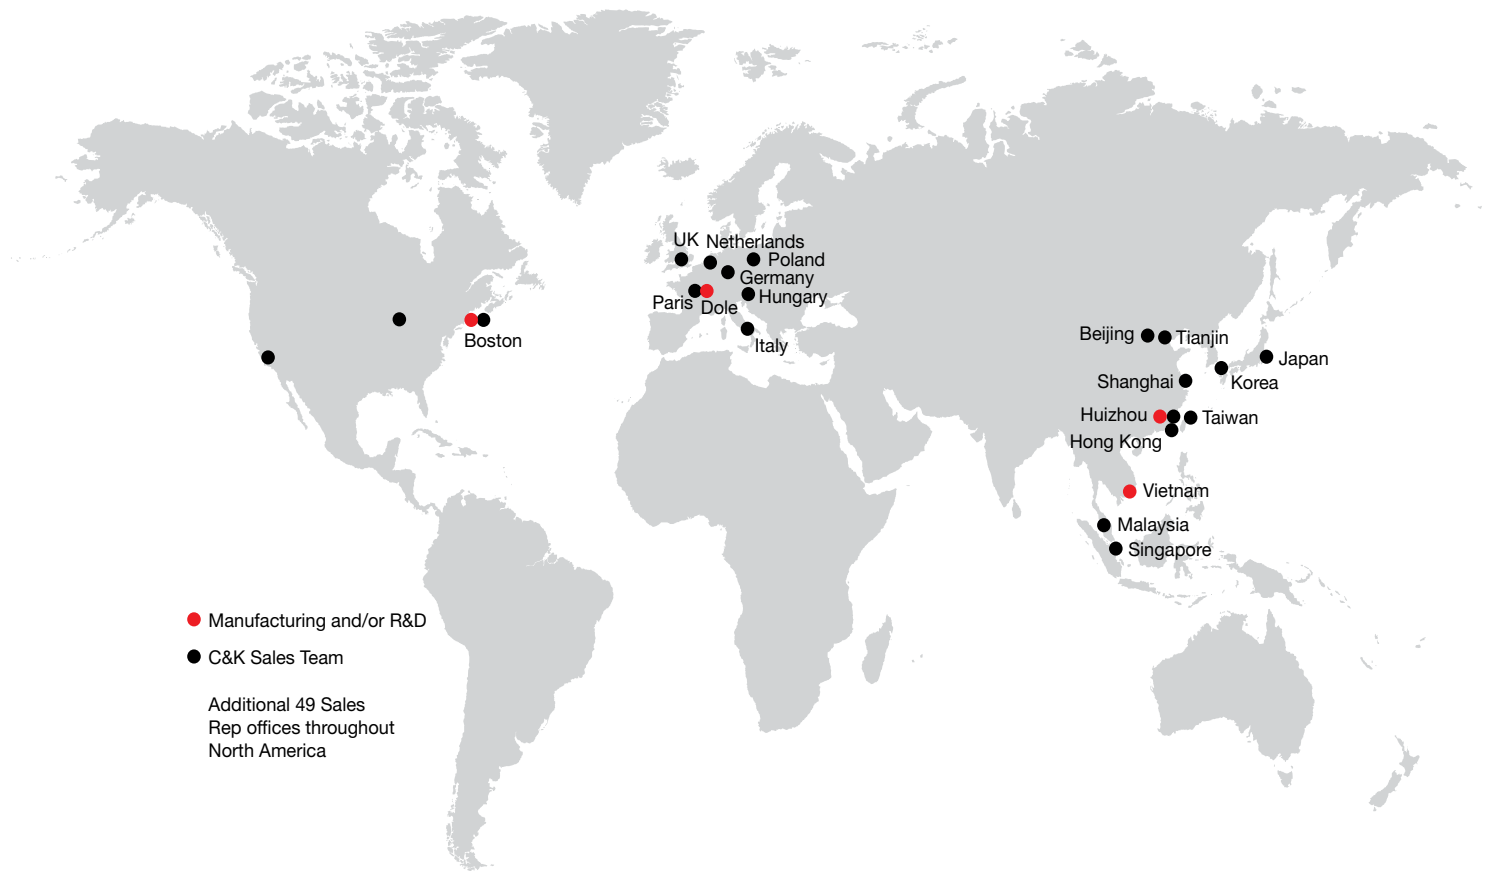

C&K OVERVIEW

- 3 regional design centers in Waltham, Mass. (U.S.), Dole, France, and Huizhou, China
- Vertically integrated high volume manufacturing offerings in ASIA and EUROPE, including
 - High-speed stamping and molding
 - Plating
 - High-volume assembly
- Unmatched research and development capabilities
- A medical segment focused innovation team
- Skilled in product, machine and tool design
- Extensive and quick-turn prototype services
- Qualification and analysis labs located in 3 regions

Contact C&K to learn how we can help you with your next design challenge.

C&K - Trusted Brand in Switch Design
